

Memoria para el video

primer caso de uso Inclusion:

The image shows a screenshot of a development environment. The top window is an IDE (likely IntelliJ IDEA) displaying a UML file named `video.puml`. The code in the editor is as follows:

```
@startuml
'https://plantuml.com/sequence-diagram

actor bibliotecario
bibliotecario --> (baja socio)
(baja socio) ..> (buscar socio) : include

@enduml
```

To the right of the code, a sequence diagram is rendered. It shows an actor labeled `bibliotecario` sending a message to a participant labeled `baja socio`. A dashed arrow labeled `include` points from `baja socio` to another participant labeled `buscar socio`.

Below the IDE window, a LibreOffice Writer window is open, titled "Sin título 3 - LibreOffice Writer". The document content is:

Memoria para el video

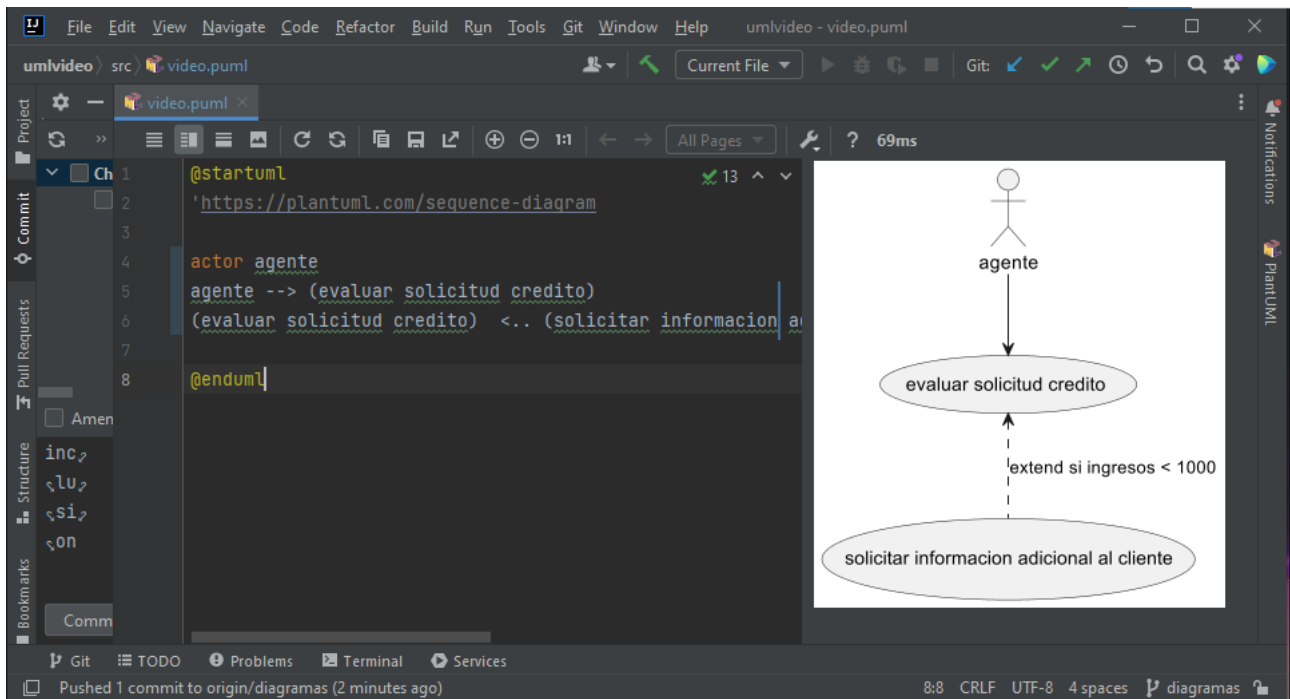

primer caso de uso Inclusion:

<-- -->

The LibreOffice Writer window also shows a search bar at the bottom with the text "Buscar" and a status bar indicating "Página 1 de 1", "Selección: 2 palabras, 3 caracteres", and "Estilo de página predeterminado".
